EDUCATION

University of Texas at Austin

Expected Graduation: Winter 2027

Bachelor of Science in Information Technology (Honors)

GPA: 3.8/4.0

- **Specialization:** Human-Centered Data Science

Relevant Coursework: Data Structures, Applied Machine Learning with Python, Text Mining & NLP Essentials, Mobile Application Development, Virtual Reality & Game Design, Ethical AI, UI/UX Design

Danish Institute for Study Abroad - Copenhagen, Denmark

August - December 2024

UT Global Ambassador

- Conducted hands-on research in Scandinavian health systems; proposed tech-driven care solutions.

TECHNICAL SKILLS:

Languages: Python, Java, C#, C++, JavaScript, SQL, Kotlin, Swift, HTML/CSS

Frameworks & Tools: PyTorch, React, Flask, Unity, Android Studio, Git, KNIME, Figma, Tableau, MongoDB

EXPERIENCE

Tesla - Fremont, CA

August 2026 - Present

AI PM Intern – Supply Chain Systems

- Scaling an internal **Retrieval-Augmented Generation (RAG)** platform to support broader supply chain use cases by expanding its knowledge base without compromising retrieval accuracy.
- Partnering with planners to identify new data sources & requirements, translating operational needs into **reliable** AI-assisted workflows.

Bank of America – Pennington, NJ

May 2026 - August 2026

SWE Intern – Global Technology

- **Architected & deployed** an enterprise Retrieval-Augmented Generation (RAG) platform, ingesting **1000+** multi-format internal assets (PDFs, spreadsheets) to generate vector embeddings & leveraging MongoDB vector search to enable AI-powered retrieval & **automate 40%** of manual tasks.
- **Automated** MongoDB operational workflows & data-processing pipelines, improving database platform scalability & reducing operational latency by 25%.

Soundscape-to-Image Lab – UT Austin

August 2025 - Present

Undergraduate Researcher – Multimodal AI

- Designed & ran multimodal experiments across nearly 12,000 samples, evaluating audio, visual, text, & spatial features through ablation studies & achieving an R^2 of 0.63.
- Fine-tuned models & optimized feature pipelines, hyperparameters, & training configurations, improving predictive performance by 10% & built automated **preprocessing & evaluation** workflows for data ingestion, feature extraction, experimentation, & reproducible result analysis.

Depository Trust Clearing Corporation (DTCC) – Jersey City, NJ

May 2025 - August 2025

IT Intern – Internal Audit & Data Analytics

- Engineered operational automation workflows using Python & KNIME, cutting audit cycle times by 25% & standardizing processes across 3 internal teams.
- Designed & validated a machine-learning model to support operational decision-making, achieving 86% accuracy & contributing to enterprise AI governance standards.
- Created & deployed a centralized KNIME Business Hub application to streamline audit processes, improving operational visibility & enabling coordination for 50+ users.

TECHNICAL PROJECTS:

AI-Driven Cardiac Risk Classifier | Python, Scikit-learn, ML Pipelines

- Engineered machine learning pipelines on 10K+ Electronic Health Records (EHRs), applying feature engineering to achieve 85% classification accuracy using Logistic Regression & Random Forest models.
- Streamlined data preprocessing stages to ensure fully reproducible workflows, reducing pipeline execution time by 30%.

SymptomSync – Clinical NLP Triage Assistant | Python, NLP, Data Structures

- Developed NLP algorithms to extract clinical symptoms, generate automated triage logic, & support clinic decision-making flows.
- Optimized query matching using efficient data structures, reducing response latency by 36%.

LEADERSHIP & ACTIVITIES

Hook 'Em Hacks — **Founder & Director**

September 2025 - Present

- Founded & directed operations for the university's inaugural AI-focused hackathon with 250+ participants, managing a \$10k budget, coordinating venue logistics, & leading sponsor outreach.
